Examination of Application #09/635,116

1. Claims 1-28 of application 09/635,116, filed on 9-August-2000, are presented for examination.

Double Patenting Rejections

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321[©] may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

In re Application of: HUANG et al.

3. Claims 1-28 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-64 of copending Application No. 09/524,088. Although the conflicting claims are not identical, they are not patentably distinct from each other because the methods of the present invention and the methods of the copending application are each directed to generating a representation of roller cone bit drilling earth formations, methods for designing roller cone bits, and methods for optimizing the drilling performance of a roller cone bit design.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Claim Rejections under 35 U.S.C. § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claim 22 is rejected under 35 U.S.C. § 102(b) as being anticipated by The article "The Computer Simulation of the Interaction Between Roller Bit and Rock", by D. Ma et al..

6. Ma et al. disclose the invention as claimed, including the simulation model of the interaction between a roller bit and rock, composed of models of the roller bits and the

bottom hole [p. 309, col. 1]. Ma et al. disclose simulating the changes to the bottom hole due to the drilling [p. 309, col. 1]; inputting parameters of the bit, teeth, the rotation rate and the WOB [p. 314, col. 1]; simulating the interaction between the bit and the rock [p. 314, col. 1]; and utilizing the simulation of the interaction between the bit and the rock to evaluate the bit structure and guide the bit design [p. 315, col. 1].

7. Claims 23-28 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response Guidelines

8. A shortened statutory period for response to this action is set to expire **3 (three) months and 0 (zero) days** from the date of this letter. Failure to respond within the period for response will cause the application to become abandoned (see MPEP 710.02, 710.02(b)).
